Abstract of JP 2001222400 (A)

PROBLEM TO BE SOLVED: To provide a method for changing printer drivers of plural computer clients from a computer for management. **SOLUTION:** Ports to be printed by the printer drivers are selected in a first step. After selection of the computer clients, the printer drivers are changed in each of the selected computer clients. A device with a means to perform the above step or a computer readable medium in which a program to perform the above step is recorded and a computer program element are provided by this invention. This invention has advantages to provide an effect that a manager does not have to perform a work by going to each of the individual computer clients when the printer drivers are changed, to specify the computer clients and to process the changes of each of the computer clients by a single execution of the program.
